## J2EE(Advanced Java): A way towards entrepreneurship

### Objective:

The original idea behind the Java Workshop was to introduce some of the practicalities faced when developing software using the Java Platform. We decided to shift the focus somewhat to a new direction, the tools that a Java Developer should have in his / her toolbox.

### Topics Covered:

1. Eclipse latest version tools
2. JDBC(java to Database connectivity) introduction
3. J2EE technologies introduction
4. CRUD operations with JDBC
5. Servlets
6. Steps to prepare First web application

Total 49 number of students participated in the workshop who took the advantage of attending the workshop with all latest tools with technologies learning.

### Glimpse of the workshop:
