Project Title

INDUSTRY METAMORPHOSIS

Abstract:

Industry Metamorphosis is the web based application generally used in Mechanical / Civil / Chemical and measure Electrical companies.

In this web based application we have modules like.

1. Online Bid management for raw materials products.
2. Employee details.
3. Security.
4. Online Resource management.

This application shows the current status of all the resources mechanically.

Every branch manager is able to see the all the resources of all the other branches online. The resource tracking is done totally machine controlled.
