Project Title

COLLEGE ATTENDANCE MANAGEMENT SYSTEM

Abstract:

The problem statement of College attendance management system of BE.(CE, ME, EC, Civil) program for a college is given. The purpose of this system is to automate and computerize the attendance of students in the college. The B.E Program is a 4 year course and consists of 8 semesters. Each subject is be assigned some specific code for convenience in maintaining thedatabase.75% is the Compulsory attendance for a student else a short attendance report is generated. So a list of students along with their daily attendance for class, subjects offered and faculty members is to be maintained. The faculty members of respective subjects provide attendance details to the data entry operator who all details into the system database. This process is carried out daily by the faculty members and the data entry operator. Attendance is updated on all weekdays except Sundays. Once the data entry operator has updated the attendance, he/she would not be allowed to change the attendance again. The students and faculty members can also login the system to view and generate reports for student information, subjects opted by them and their attendance in any subject. The system will generate monthly attendance reports and the reports should be printable.
