Project Title

ROAD TRANSPORTATION ADVISORY PORTAL

Abstract:

It is information kiosk for visitors around the world to have know-how and awareness of Vehicle, security, RTO's guideline for registrations, transfer of vehicles. In addition this system offers number of services including helpline, vehicle portfolio for members (free membership), vehicle consultancies and their services, learners' license online mock tests and so on. The purpose of our RTAP management system is to provide a leading technological tool (Website) for the ease of RTAP functions such as Registration, Learners License, Helpline, Customer inquiries, Recruitment in RTAP, Customer Vehicle Portfolio etc... This system gather data from different areas including government institutions, businesses, experts and from ordinary people. The system itself manage and process the data, produce desire result based upon people understanding. The purpose of our RATP system is to provide a leading technological tool(Website) for the ease of RATP functions such as Registration, Learners License, Helpline, Customer inquiries, Recruitment in RTAP, Customer Portfolio etc. It will reduce considerably the difficulties faced on existing system, with minimum error and difficulties.
