PROF.. R..L..PATEL

SMT. S. R. PATEL ENGINEERING COLLEGE, UNJHA

Project Title

RESULT ALERT SYSTEM

Abstract:

In this project E-mail and SMS technology is implemented for the fast and reliable procurement of exam results. Now also even after the publication of exam result by the university/board, the candidates have to wait a long time to get their result details. This problem is tried to be solved through this system which uses E-mail and SMS to provide exam results to the needed candidates. The candidates who have registered for exam will have to provide their E-mail Id and mobile number for contact. After the exam result has been published from the university these candidates can call the result centre and give their exam registration number. Now their exam result will be automatically provided at their mail box.
