Project Title

DIAMOND ERP

Abstract:

Diamond erp software is the business management software. In this software all the data of diamond factory are easily maintained. With the use of this software all employee information is maintained. This software easily maintained the account part of the factory. This software divided in the three parts are employee work, accounting, reporting. in employee work 5 phases to create a diamond. and under a manager number of workers works. in accounting part the salary of the manager and worker are calculated. the price of row material is note here and the benefits and losses are count. in reporting part the daily work and salary of each employee are maintained. also the record of the weight of the row material and final product. for periodical stock checking, stock at each department or storage is maintained with work completed stock. track of damaged lost stones as well as wastage at each stage is done. It's easier to provide high-quality customer service using an ERP system.
