Project Title

E-KRISHI SAHAYAK PORTAL

Abstract:

The agricultural information system provides its users and researches to get online information about, the crop, statistical details and new technologies. E-krisi sahayak Portal provide detailed information on-crops, crop management techniques, fertilizers and pesticides and a host of another agriculture related material. E-krisi sahayak portal enable farmers to network with other farmers, suppliers and consumers across the world. E-Krisi Sahayak enables the farmers to get the required information which is specific to their needs through the system. Agriculture experts get the information about the crop situation through the internet in the form of both text and image data ,and then generate the appropriate advice which is sent to the farmer through the Internet. Shopping has evolved with the growth of technology. In recent years, online agriculture shopping has become popular and one who has a computer with internet and bank account can shop from their home.
