Project Title

FINANCIAL ADVISOR

Abstract:

The Web application "Financial Advisor" is used for the saving the time of solving of problem in any organization. The application used in first Employee register its account then Admin Approve and that use. And Same as advisor register its account then admin approve. And also admin suggest the client to choose the advisor. Also, some biz partner invests their money in our company. And they can show their profit or loss via their own dashboard. We provide the agent to calculate their commission via commission calculator.
