Project Title

TRAVEL ON

Abstract:

This Project is very useful to the customer who have book the cab emergency and driver who are working in the cab service. User can book the ride easily and driver can see the customer profile and pick up the customer from its current location.

The most advantage of this site is RIDE TYPE. There are three types of ride.

- 1) Sharing cab
- 2) Round trip
- 3) One way.

In sharing cab if there are two customer which have same destination then they can use sharing cab facility, in this these user can divide rent so with less money the customer can reach it's destination. In travel on site driver and customer can also manage them profile and admin can manage customer and driver profile
