Project Title

PARTY LOCK

Abstract:

The party plot web site used for find the party plot. The aim of this application that the customer can find the party plot easily. So this application is less time consuming. This application will help find the party plot in required area easily. Registration must be required for party plot owner and customer. The party plot owner can register to add the details of party plot like party plot area, city, event type, available packages, etc. The customer can search the party plot. If party plot is available according to the customer's requirement, then the customer book the party plot. The customer finds the party plot at particular area then party plot owner display the available party plot of that area which is not reserve and customer can easily reserve the party plot. After reserve party plot the party plot owner can see all the details of customer and confirm the party plot. After confirmation advance payment process is done. This application will reduce paper work and maintains record in more efficient way.
