Project Title

ONLINE FACULTY LEAVE MANAGEMENT SYSTEM

Abstract:

The main objective of the proposed system is to decrease the paper work and easier record maintenance by having a particular website for leaves maintenance. This approach basically deals with the record of leaves taken by faculty members in the organization. This system also approaches to reduce the formalities and time delay facing by faculty members for the approval of leave. Faculty is allowed to log in /log out in their account for the leave apply by a unique id provided by HR department. Lecture and lab slot information is transferred to those faculties who are going to take lectures or lab of that faculty. if all the faculties are ready to take lecture or lab then leave application will be forwarded to the HOD. HOD verify the leave application If the leave is verified by the HOD then it is forwarded to the principal for the approval. Principle is having authority of approval or disapproval of leave after approval of HOD and remark on that.
